

Fund description

The Fund invests in a mix of shares, bonds, property, commodities and cash. The Fund may buy assets outside the common monetary area (CMA) up to a maximum of 40% of the Fund. The Fund typically invests the bulk of its foreign allowance in a mix of funds managed by Orbis Investment Management Limited, our offshore investment partner. The maximum net equity exposure of the Fund is 40% and we may use exchange-traded derivative contracts on stock market indices to reduce net equity exposure from time to time. The Fund is managed to comply with the investment limits governing retirement funds. Returns are likely to be less volatile than those of an equity-only fund or a balanced fund.

Fund objective and benchmark

The Fund aims to provide a high degree of capital stability and to minimise the risk of loss over any two-year period, while producing long-term returns that are superior to bank deposits. The Fund's benchmark is the daily interest rate, as supplied by Standard Bank Namibia Limited, plus 2%.

How we aim to achieve the Fund's objective

A major portion of the Fund is typically invested in money market instruments. We seek to deploy the Fund's cash by investing in shares when they can be bought at a significant discount to their intrinsic value. We thoroughly research companies to assess their intrinsic value from a long-term perspective. This long-term perspective enables us to buy shares which are shunned by the stock market because of their unexciting or poor short-term prospects, but which are relatively attractively priced if one looks to the long term. If the stock market offers few attractive shares, we may allocate a low weight to shares or partially hedge the Fund's stock market exposure in consideration of the Fund's capital preservation objectives. The Fund may also invest in bonds, property and commodities. The Fund's bond and money market investments are actively managed.

Suitable for those investors who

- Are risk-averse and require a high degree of capital stability
- Seek both above-inflation returns over the long term, and capital preservation over any two-year period
- Require some income but also some capital growth
- Wish to invest in a unit trust that complies with retirement fund investment limits

Minimum investment amounts

Minimum lump sum per investor account	N\$20 000
Additional lump sum	N\$500
Minimum debit order	N\$500

- Maximum percentage decline over any period calculated from monthly returns. The maximum drawdown occurred from 31 January 2020 to 31 March 2020. Drawdown is calculated on the total return of the Fund (i.e. including income).
- The percentage of calendar months in which the Fund produced a positive monthly return since inception.
- The standard deviation of the Fund's monthly return. This is a measure of how much an investment's return varies from its average over time.
- These are the highest or lowest consecutive 12-month returns since inception. This is a measure of how much the Fund and the benchmark returns have varied per rolling 12-month period. The Fund's highest annual return occurred during the 12 months ended 31 August 2023 and the benchmark's occurred during the 12 months ended 30 June 2024. The Fund's lowest annual return occurred during the 12 months ended 31 March 2020 and the benchmark's occurred during the 12 months ended 31 August 2021. All rolling 12-month figures for the Fund and the benchmark are available from our Client Service Centre on request.
- The daily interest rate, as supplied by Standard Bank Namibia Limited, plus 2%. Performance as calculated by Allan Gray as at 30 April 2025.

% Returns	Fund	Benchmark ⁵
Cumulative:		
Since inception (5 December 2016)	88.6	63.5
Annualised:		
Since inception (5 December 2016)	7.8	6.0

Lowest annual return ⁴	-4.5	3.6

Income distributions for the last 12 months

To the extent that income earned in the form of dividends and interest exceeds expenses in the Fund, the Fund will distribute any surplus quarterly.	30 Jun 2024	30 Sep 2024	31 Dec 2024	31 Mar 2025
Cents per unit	1522.2019	1448.1605	1320.2146	1392.6535

Annual management fee

Allan Gray charges a fee based on the net asset value of the Fund excluding the portion invested in Orbis funds. The fee rate is calculated daily by comparing the Fund's total performance over the last two years, to that of the benchmark. If the Fund's return over two years is equal to or less than 0%, Allan Gray will not charge a fee.

Fee for performance equal to the Fund's benchmark: 1.00% p.a.*

For each percentage of two-year performance above or below the benchmark we add or deduct 0.1%, subject to the following limits:

Maximum fee: 1.50% p.a.*
 Minimum fee: 0.50% p.a.*

This means that Allan Gray shares in approximately 20% of annualised performance relative to the benchmark.

A portion of the Fund may be invested in Orbis funds. Orbis charges performance-based fees within these funds that are calculated based on each Orbis fund's performance relative to its own benchmark.

*Management fees charged for the management of unit trust portfolios do not attract VAT.

Total expense ratio (TER) and transaction costs

The annual management fees charged by both Allan Gray and Orbis are included in the TER. The TER is a measure of actual expenses incurred by a fund over a one and three-year period (annualised). Since Fund returns are quoted after deduction of these expenses, the TER should not be deducted from the published returns (refer to page 4 for further information). Transaction costs are disclosed separately.

Total investment charge	1.77	1.79

Note: There may be slight discrepancies in the totals due to rounding.

The first quarter of 2025 saw the local equity market add to the decent gains posted in the preceding year, with the FTSE NSX Local Index returning 6.3% as companies reported strong results. South African (SA) shares, represented by the FTSE/JSE All Share Index returned 5.9%. Among the largest contributors to returns at the SA index level were precious metal miners, telecommunications providers and the dual-listed consumer goods companies, including AB InBev, British American Tobacco and Richemont. Gains for the SA banks, insurers and retailers have either begun to stall or go backwards, while the diversified miners and other cyclical rand hedges Sasol and Mondi have continued to struggle in the new year. The IJG All Bond Index eked out a 1.3% gain for the quarter, slightly ahead of the FTSE/JSE All Bond Index's 0.7% gain, as the risk premium ascribed to SA government bonds increased, particularly on longer-dated instruments. The faltering US market contributed to declines in the MSCI World Index and the S&P 500, which returned -1.8% and -4.4% in US dollars respectively over the quarter.

Against this backdrop, the Fund returned 3.6% for the quarter – 1.9% ahead of its benchmark.

Fund holdings in AB InBev, gold exchange-traded funds and gold miners were among the largest contributors to performance. Gains for AngloGold Ashanti and Gold Fields have been particularly strong, with share prices more than 50% higher year to date in rands – this as the gold price breached US\$3 000 per ounce for the first time and continued to set new highs. Predominant trends, including diversification away from the US dollar with increased interest in gold as a reserve asset, fears of stagflation in developed economies as growth slows, and political and trade uncertainties, remain more relevant than ever. Despite this, equity investors remain sceptical of the trajectory of the gold price, with

valuations of the miners, including those mentioned above, screening as very compelling at the spot price.

The offshore component of the Fund was a contributor to overall returns, primarily driven by stock selection. Defence-related holdings were among the leading contributors, having benefited from increased global defence spending and European government commitments to future defence investment. US dollar weakness also aided returns, given the Fund's underweight exposure. The offshore component has been positioned against the narrative of American exceptionalism for some time and continues to have limited US exposure.

It is worthwhile noting that events occurring immediately post quarter end pose a possible threat to wider risk asset returns – namely, the sustainability of South Africa's government of national unity following the conflict-ridden Budget process and the ratcheting up of global trade tensions after President Donald Trump's "Liberation Day" tariff announcements. Locally, our new administration brings unknowns around policies and fiscal stance. Last quarter, we wrote about our concerns regarding unsustainable valuation levels both in South Africa and globally, and what this may mean for future returns. This, coupled with geopolitical pressures and elevated uncertainty, makes for increased market volatility ahead.

In our opinion, the Fund's current defensive positioning in terms of stock selection, a 26% net equity weight (which is below the 40% maximum), its sizeable asset allocation towards hedged equities, and its fixed income positioning ensure that we are well placed to navigate these challenges.

Management Company

Allan Gray Namibia Unit Trust Management Company is an approved management company in terms of the Unit Trusts Control Act 54 of 1981 as amended, and is incorporated and registered under the laws of Namibia and supervised by the Namibia Financial Institutions Supervisory Authority (NAMFISA). The trustee and custodian is Standard Bank Namibia.

Performance

Unit trusts are generally medium- to long-term investments. The value of units may go down as well as up and past performance is not necessarily a guide to future performance. Where annualised performance is mentioned, this refers to the average return per year over the period.

Unit price

Unit trust prices are calculated daily on a net asset value basis, which is the total market value of all assets in the portfolio, including any income accruals and less any permissible deductions from the portfolio, divided by the number of units in issue.

Redemptions

Allan Gray Namibia Unit Trust Management Company will repurchase any number of units offered to it on the basis of prices calculated in accordance with the requirements of the Unit Trusts Control Act 54 of 1981 as amended and on the terms and conditions set forth in the trust deed.

Total expense ratio (TER) and transaction costs

The total expense ratio (TER) is the annualised percentage of the Fund's average assets under management that has been used to pay the Fund's actual expenses over the past one- and three-year periods. The TER includes the annual management fees that have been charged (both the fee at benchmark and any performance component charged) and other expenses like audit and trustee fees. Transaction costs (including brokerage, securities transfer tax, Share Transactions Totally Electronic (STRATE) and investor protection levies where applicable) are shown separately. Transaction costs are necessary costs in administering the Fund and impact Fund returns. They should not be considered in isolation as returns may be impacted by many other factors over time, including market returns, the type of financial product, the investment decisions of the investment manager, and the TER. Since Fund returns are quoted after the deduction of these expenses, the TER and transaction costs should not be deducted again from published returns. As unit trust expenses vary, the current TER cannot be used as an indication of future TERs. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. Instead, when investing, the investment objective of the Fund should be aligned with the investor's objective and compared against the performance of the Fund. The TER and other funds' TERs should then be used to evaluate whether the Fund performance offers value for money. The sum of the TER and transaction costs is shown as the total investment charge (TIC).

Compliance with Regulation 13

The Fund is managed to comply with Regulation 13 of the Pension Funds Act 24 of 1956. Exposures in excess of the limits prescribed in Regulation 13 shall be dealt with in accordance with Regulations. Notwithstanding the aforesaid, the Fund does not hold Unlisted Investments in accordance with Regulation 13(5) and the Management Company does not monitor compliance by retirement funds with section 19(4) of the Pension Funds Act.
